

APL ^{CHAD}52

PERFORMANCE

Racing

Adam took to the track on Saturday night with a great improvement from last weeks' racing. The crew (Brendo, Dave, Dallas, & Al) and Adam worked hard at keeping the speed of the car up to the track.

A tough night was ahead with a twin feature format, Adam avoided a first corner collision in heat 1 which put him back a couple of positions, but he recomposed and moved from the back of the field to 5th, which put him into the main.

The main was a tough race but with a good set up from the crew we were able to maintain a fast speed and manage to mix it up in the front of the field, (attached is a photo of Adam with Mitchell Dumsdey #77 who is track champion and one of the top drivers in the country). Adam was able to keep him in his sites and finish off with a good result.

All sponsors were mentioned by the commentary team when Adam hit the track for heat 1 and thank you to Greg Miller from Millers Turf for the feedback in relation to having great success with sponsoring the car.

The car always looks great and is well presented, thanks to Dallas at Sidewinder computer services : www.sidewinderpc.com.au

A special mention to T & G Sheetmetal, Greg is a personal friend of mine and nice guy, he has come on board to trial this form of Advertising - APL Racing.

Greg is an expert and leader in his field and a successful businessman that settles for nothing but perfection in his work, please look into his website - his capabilities will amaze you. www.tgs-aust.com.au

Only a few races remain for this season, Adam will miss the next two as he will be having a holiday with his family and importantly seeing the completion of Chad's School in Vanuatu and some very happy children in school now. My son's legacy lives on thanks to Dave Denton from Denton homes. www.dentonhomes.com.au/article.htm

I think you'd agree this is a unique photo, and I think Chad was with me!
