## RS4 PRO RACING HELMETS

The **new Shark RS4 Pro Racing** helmets, are distributed by Sydney's APL Performance Bikes.

APL Performance Bikes is an award winning, renowned, Australian owned and operated business that services and customises motorcycles.

Adam Layton (owner / operator) has been a motorcycle technician for 20 years and has raced bikes all his life. He has travelled all over the world with Japanese racing bikes, working under the best riders in the world. With his racing background Adam's attention to detail is 100%.

The RS4 helmets comply with world auto racing standards. Straps, lining, helmet etc are all bar coded for authenticity.

This product represents the latest in helmet design which is dominating the European racing and has just landed in the USA.

They also are the highest selling helmet in Australia.

The **new Shark RS4 Pro Racing Helmets** are manufactured in Europe.

Most importantly they are of the highest quality, they will not fall apart.

The visor is injected moulded which cannot be smashed and the visor is "quick release" - two seconds and it clips off. A new visor with tear offs can be re-stacked straight away.

(None of the helmets in Australian

speedway have such a quality visor).

"With my connections in painting, they can be airbrushed however desired though with an additional cost," Adam said.

The **Shark RS4 Pro Racing Helmet** is endorsed by leading sprintcar driver Marty Perovich. He will be wearing the helmet in the USA for his racing campaign. *"The Shark Helmet is the most comfortable helmet, the nicest I have seen. The quality is awesome and the quick release of the visor is handy," Perovich said.*

### APL PERFORMANCE

APL Performance is considered to be leading in V Twin Harley's performance and servicing and is recognised throughout Australia and the USA.

"My workshop is based on quality not quantity, I believe in selling a few great products, not a lot of brands. I believe in one-on-one service with my clients. I perform basic servicing on all motorcycles right up to building Australia's leading Choppers," Adam Layton told SRN.

"I have worked for motorcycle race teams overseas for riders such as Chad Reed. I now base myself in Australia and the reason was to have a family and race sprintcars.

Sometimes I need to put

in the extra hours to pay for it but most times it's worth it. I'm glad my business ties in with supporting speedway.
